ITALIA

Università e Istituti Superiori.

Ordinamento delle Università e degli istituti superiori. L'istruzione superiore è impartita nelle Università e negli Istituti Superiori. Lo Stato provvede interamente a sue spese a 16 RR. Università (Bologna, Cagliari, Genova, Napoli, Padova, Palermo, Pavia, Pisa, Roma, Torino); a 6 RR. Scuole d'Ingegneria (Bologna, Napoli, Padova, Palermo, Pisa, Roma); ad una Regia Scuola Superiore d'Architettura (Roma) e mediante convenzione con Enti concorre al mantenimento di 11 Regie Università (Bari, Catania, Firenze, Macerata, Messina, Milano, Modena, Parma, Perugia, Sassari, Siena); di 2 Regie Scuole d'Ingegneria (Milano, Torino); di 1 R. Scuola di Chimica industriale (Bologna) ed una R. Scuola d'Ingegneria Navale (Genova).

Esistono anche Università ed Istituti Superiori liberi (Università di Camerino, Ferrara, Urbino, Università Cattolica del Sacro Cuore in Milano e Istituto Superiore di scienze sociali « Cesare Alfieri » di Firenze), mantenuti da Enti locali e parificati in ogni effetto alle Università ed agli Istituti Superiori regi. Esse si uniformano alle norme fondamentali che regolano le Università e gli Istituti di Stato.

Hanno funzione e grado di Istituti Universitari, ma sono retti da speciali norme, gli Istituti Superiori di Magistero (Roma, Firenze, Messina), regio pareggiati, che hanno il compito:

a) di compiere la cultura dei licenziati dagli Istituti Magistrali preparandoli ad impartire insegnamenti di filosofia e pedagogia negli Istituti Magistrali e di discipline letterarie nelle Scuole Medie;

b) di abilitare gli insegnanti delle pubbliche scuole elementari all'ufficio di Direttore didattico e d'Ispettore scolastico.

Esistono, infine, Istituti Superiori che hanno carattere prevalentemente professionale e dipendono non dal Ministero della P. Istruzione, ma da altri Ministeri. Particolare importanza hanno tra questi Istituti gli Istituti Superiori di Commercio, gli Istituti di Medicina Veterinaria, gli Istituti Superiori di Agraria, tutti dipendenti dal Ministero dell'Economia Nazionale e retti da speciali disposizioni, che peraltro si modellano su quelle stabilite per gli Istituti Superiori dal Ministero della P. I.

Ogni Università o Istituto, Superiore ha un proprio Statuto, approvato con R. Decreto su proposta del Senato Accademico, uditi il Consiglio d'Amministrazione e le Facoltà o Scuole che compongono l'Università, e per gli Istituti Superiori su proposta del Consiglio della Scuola, udito il Consiglio di Amministrazione.

Lo Statuto stabilisce l'organizzazione didattica, determinando per ciascuna Università od Istituto le Facoltà o Scuole che ne fanno parte, le materie d'insegnamento, il loro ordine ed il modo in cui debbono essere impartite.

Gli insegnamenti sono coordinati in modo da costituire Facoltà o Scuole. Oltre le Facoltà e le Scuole tradizionali (Facoltà di Giurisprudenza, di Medicina e Chirurgia, di Lettere e Filosofia, di Scienze Matematiche, Fisiche e Naturali, Scuole d'Ingegneria e di Farmacia) possono essere costituite Facoltà e Scuole dirette a fini speciali e Scuole di perfezionamento.

L'anno accademico comincia il 16 ottobre e termina il 31 luglio. Il periodo delle lezioni comincia non più tardi del 5 novembre e termina il 15 giugno.

Immatricolazione ed Iscrizione ai corsi. — Coloro che hanno superato l'esame di maturità per i provenienti dal liceo classico possono essere iscritti quali studenti, presso ogni Facoltà o Scuola. Coloro invece che hanno superato l'esame di maturità per i provenienti

dal Liceo Scientifico possono essere iscritti, quali studenti, soltanto presso le Facoltà di Medicina e Chirurgia, Scienze Matematiche, Fisiche e Naturali e presso le Scuole di Farmacia, d'Ingegneria e Architettura.

Chi aspira ad ottenere l'immatricolazione in una Università o Istituto Superiore deve entro il 5 novembre presentare domanda in carta legale al Rettore o Direttore indicando:

a) nome dei genitori;
b) luogo di nascita;
c) residenza di famiglia;
d) abitazione dello studentie nela città, sede del l'Università o Istituto.
e) Facoltà o Scuola a cui intende iscriversi

La domanda deve essere corredata dei seguenti documenti:

1° certificato di nascita debitamente legalizzato;
2° diploma di maturità;
3° quietanze del pagamento della tassa d'immatricolazione, della prima rata della tassa annuale d'iscrizione e della prima rata della sopratassa annuale per esami di profitto.

Per l'iscrizione ad un anno successivo al primo occorre farne domanda al Rettore o Direttore, corredandola delle quietanze del pagamento della prima rata della tassa annuale d'iscrizione e della prima rata della sopratassa annuale per esami di profitto.

I cittadini italiani residenti all'estero, gli italiani non regnicoli e gli stranieri possono essere ammessi presso le Università e gli Istituti Superiori all'anno di corso per il quale siano ritenuti sufficienti i titoli di studio conseguiti all'estero.

Tale giudizio spetta per le Università al Senato Accademico, udita la Facoltà o Scuola competente, e per gli Istituti al Consiglio della Scuola.

Per giovarsi di tale disposizione gli interessati debbono presentare al Rettore dell'Università o Direttore dell'Istituto:

a) domanda d'immatricolazione e d'iscrizione alla Facoltà o Scuola per l'anno di corso cui aspirano;
b) documenti comprovanti gli studi secondari compiuti all'Estero e gli studi eventualmente compiuti e gli esami sostenuti presso Università o Istituti superiori esteri;
c) un esposto documentato contenente esatte informazioni circa la natura ed il valore degli studi compiuti e dei titoli conseguiti all' esteri;
d) qualsiasi altra titolo o documento che credano utile presentare nel loro interesse.

Tanto l'attestato degli studi quanto la fede di nascita, che devono essere uniti alla domanda, occorre siano legalizzati dal Console italiano nel luogo in cui sono stati rilasciati, e autenticati dal Ministero degli Esteri del Regno d'Italia.

Gli studenti che provengano da Università o Istuti Superiori esteri e intendano frequentare uno o più corsi in Università o Istituti Superiori italiani, possono ottenere l'iscrizione a corsi singoli, presentando soltanto il libretto o altro documento dell'Università o Istituto da cui provengano.

Gli studenti iscritti a corsi singoli, in base alle predette norme possono ottenere un certificato degli studi compiuti, e, in seguito a prove d'esame determinate dal Consiglio di Facoltà o Scuola, anche un attestato speciale del profitto riportato.

Durata degli studi. — Esami. — Tasse. Gli studi universitari durano 4 anni per la laurea in Giurisprudenza, in Filosofia o in Lettere, in Scienze Matematiche, Fisiche, e Naturali; 6 per la laurea in Medicina e Chirurgia; 5 per la laurea in Chimica e Farmacia; 4 per diploma professionale di Farmacista; 5 per la laurea in Ingegneria; 5 per la laurea in Architettura; 5 per la laurea in Chimica Industriale.

Gli esami sono di profitto e di laurea o diploma; quelli di profitto si sostengono non per ogni singola materia ma per gruppi di esse, secondo stabiliscono gli statuti di ciascuna Università. Quelli di laurea o diploma si sostengono alla fine del corso e sono ordinati in modo da accertare la maturità intellecttuale de candidato.

Le lauree e i diplomi rilasciati delle Università e dagli Istituti Superior hanno esclusivamente valore di qualifiche accademiche e coloro che ne sono in possesso debbono per essere abilitati all'esercizio professionale, superare il relativo esame di Stato.

L'esame di Stato si svolge in unica sessione annua nel mese di novembre.

Ai cittadini stranieri è concessa la dispensa dal pagamento della metà delle tasse e sopratasse scolastiche e di qualsiasi contribute.

TCHÉCOSLOVAQUIE

PRAHA (Prague).

Université de Charles (1929).

(Universita Karlova).

Fondée en 1348.

Nombre d'étudiants (1928-1929) : 9.213.

Budget de l'Université (1929) : 24.361.624 kč.

Recteur : **Jindř. Matiegka.** — *Directeur du Bureau* : **J. Čech.**

Fondée le 7 avril 1348 par Charles, roi de Bohême ; pendant 200 ans, l'Université de Prague reste tchèque. Puis en 1653 l'empereur Ferdinand III réunit les débris de l'Université au Collège des Jésuites de Prague, d'où la dénomination ultérieure : « Universitas Carolo-Ferdinandea ». Les Allemands y sont les maîtres. Cet état de choses dure jusqu'au 28 février 1882 où, grâce à l'importance toujours croissante de la langue tchèque, l'Université a été divisée en deux : l'Université tchèque et l'Université allemande. Mais ce n'est que la dernière guerre qui a rendu entièrement l'Université de Prague à la nation pour laquelle son roi Charles l'avait fondée. Avec la restitution de ses droits l'Université a repris aussi son ancien nom : **Universitas Carolina.**

Cet établissement a dans ses attributions les travaux astronomiques pour le service géodésique de la Prusse ; il centralisait tout ce qui est relatif aux recherches de haute géodésie. A ce titre, il dirigeait le service de hauteur du pôle pour la détermination de la variation des latitudes et exécutait les calculs qui y sont relatifs ; il s'efforce d'étendre et d'assurer les mesures de l'intensité de la pesanteur (deux expéditions en plein Océan furent faites dans ce but). Il coordonnait les résultats obtenus dans les divers pays concernant les mesures de la Terre.

Travaux. — L'Observatoire poursuit l'étude physique des astres, de leur température, des couches successives qui les composent et surtout de leurs divers rayonnements. Il organise toutes les applications aux astres de l'analyse spectrale et des découvertes nouvelles de la physique. Il est, d'après la loi qui l'a fondé, consacré spécialement au Soleil ; il relève journellement par la photographie les quatre couches superposées, distinguées jusqu'ici dans le Soleil et son atmosphère et, en particulier, la couche supérieure avec ses protubérances ; il étudie aussi avec soin les astres qui ont un diamètre apparent, les planètes, comètes et nébuleuses et il est organisé fortement aussi pour les étoiles et les

astres faibles. En particulier, il recherche dans les étoiles les couches superposées de leur atmosphère pour la comparaison avec le soleil.

L'Observatoire poursuit à la fois des recherches d'astronomie et de physique pure.

Instruments. Pendules garde-temps de haute précision (temps sidéral). — Pendules de temps moyen, appareils émetteurs de signaux de Behn, Brille-Leroy, etc. Installation de réception et d'enregistrement de T. S. F.

Travaux. Les travaux du B. I. H. sont de plusieurs genres, savoir : *Commande* de signaux horaires émis par l'intermédiaire des postes français de T. S. F. ; réception et comparaison de signaux radio-horaires d'origines diverses. Calcul des heures définitives de réception des signaux, comparaison avec les résultats des autres observatoires et publication des résultats. Étude des questions diverses touchant la détermination, la conservation et la propagation de l'heure, etc.

1° **Commande de signaux horaires.** — Le B. I. H. commande, à heures fixes, des signaux radio-horaires émis par les postes de T. S. F. de Bordeaux-Lafayette (FYL, 18.900m), de Paris-Tour-Eiffel (FLE, 2.650m) et de Paris-Issy (FLJ, 32m).

Ces signaux sont de deux sortes : ceux dits type *international* ou ordinaire, et ceux du type scientifique ou signaux *rythmés*. Les signaux ordinaires, plus faciles à observer, sont destinés à répondre aux besoins de la navigation, de la météorologie, de la sismologie, des chemins de fer, postes et télégraphes, des administrations publiques, horlogers, particuliers, etc. Ils sont émis automatiquement par les appareils Behn ou Brillé-Leroy.

Les signaux rythmés donnent l'heure aussi exactement que l'état actuel de la Science le permet, pour les services astronomiques ou connexes.

2° **Réceptions et enregistrements.** — Signaux d'Annapolis, Lafayette, Nauen, Paris, Saigon et Rugby, par comparaison avec une des pendules de haute précision.

3° **Relevé des signaux d'enregistrement**, comparaison à l'observation directe, calcul de l'heure définitive, etc..

4° **Publications.** —

NOTE SUR LE CONSEIL INTERNATIONAL DE RECHERCHES

La grande guerre, qui avait divisé le monde presque tout entier en deux groupes antagonistes, a conduit les puissances de l'Entente à établir les relations scientifiques internationales sur de nouvelles bases. Jusqu'alors, les Associations scientifiques internationales étaient comme isolées les unes des autres : par exemple, l'Association géodésique internationale tenait ses réunions, dressait un programme, etc., presque sans tenir compte de ce qui était fait dans les autres Associations, même dans celles dont le terrain était le plus voisin du sien, comme l'Association sismologique, etc.. Après la guerre, les puissances groupées autour de l'Entente ont cherché à former un ensemble homogène, et ainsi a été constitué le « Conseil international de Recherches », organe suprême susceptible d'étendre son action à toutes les connaissances où la coopération internationale est utile. Des réunions préparatoires, tenues à Londres d'abord, à Paris ensuite, en 1918, jetèrent les bases du nouvel organisme ; et enfin une assemblée constitutive, tenue à Bruxelles en juillet 1919, l'a définitivement créé. Ce Conseil a deux organes : une *Assemblée plénière* et un *Conseil exécutif*. Chaque science forme une *Union internationale* dépendante du Conseil, mais jouissant d'une large autonomie : ainsi ont été constituées d'abord l'*Union astronomique*, puis un grand nombre d'autres (Mathématiques, Physique, Chimie, Géologie, Géographie, etc.). L'Union astronomique s'est divisée en Commissions, dont le nombre actuel peut être augmenté à mesure des besoins, et la 31e est celle de l'Heure, dont dépend le *Bureau International de l'Heure* indiqué ci-dessus.

BIBLIOTHÈQUES ET ARCHIVES

Il est rappelé que l'insertion n'a lieu qu'autant que le Questionnaire envoyé au Chef de service a été retourné.

Note. — Les **Annuaires** des divers pays du monde décrivent un assez grand nombre de Bibliothèques qui ne figurent pas dans l'**Index Generalis**.

Les Bibliothèques que nous ne décrivons pas sont en général « *en sommeil* », faute de crédits ou par suite de la négligence de leurs conservateurs.

L'Index Generalis étant contraint de se limiter aux Bibliothèques les plus importantes et les plus vivantes, nous avons fait un choix aussi judicieux que possible.

FRANCE et ALGÉRIE

Il existe en France : 1° des **Archives départementales**, soumises à une réglementation uniforme ; 2° des **Archives municipales** ou **communales**, le plus souvent laissées aux soins du Bibliothécaire municipal ou du Maire ; bien qu'il soit difficile d'avoir des renseignements sur les Archives municipales, nous avons fait figurer les plus importantes d'entre elles.

N. B. — Les *Registres paroissiaux* renferment souvent des documents intéressants, postérieurs pour la plupart au début du XVII^e^ siècle. Certaines *Etudes notariales* présentent de l'intérêt ainsi que certains *Fonds* appartenant à des particuliers, ordinairement représentants de l'aristocratie antérieure à la période révolutionnaire (1).
